## We Elevate... Hotels

We have over 100 year experience supplying elevators and escalators to hotels worldwide. Using the latest technology, we bring a new look and feel, enhanced security, in-car entertainment and exceptional performance that's matched to guests' needs and individual hotel layouts.

# First-class mobility for business or vacation guests

Our elevators and escalators deliver guests to their rooms quietly, efficiently and comfortably, and can be designed flexibly to form a valuable complement to your hotel's interior design.

**Seamless, comfortable mobility.** Designed to meet Swiss standards of precision, Schindler hotel elevators ensure a swift, reliable and informative ride for guests, to their room, reception or any in-hotel facility. The journey to excellence begins with initial layout planning and selecting the right product combination. Exclusive engineering provides smooth, quiet operation for the most comfortable rider experience.

**Tailored solutions.** It's a major challenge to design or rebuild a hotel to meet the needs of staff and guests alike. We can help. Our infotainment systems can display meeting room capacity, and Schindler's PORT Technology access control system can reserve elevators for special occasions and guests. We tailor our décors to match the unique atmosphere of any hotel's interior design. And our service concept is designed to meet your every need, including having technicians available day and night for special events and conferences.

**Efficient operation.** We balance maximum operation efficiency with minimum energy consumption. We use the latest technology and preventive maintenance to ensure reliable operation. Our regenerative drives and LED technology save energy for greener operation. Schindler has registered Environmental Product Declarations (EPD) at the "International EPD® System" for all major elevator product lines, taking an important step further in the assessment of the environmental performance of our products, underlining our continuous efforts towards sustainable solutions.

**Maximized traffic.** Layout planning and traffic simulations ensure the optimum balance of elevators with hotel capacity. And Schindler's industry-leading PORT Destination control systems ensure outstanding efficiency and passenger comfort even at peak times.

**Matching design.** Pre-specified or fully-customized designs to complement your hotel's architecture.

**Durable interior.** We fit robust designer interiors, and our doors are engineered for high-frequency opening and closing.

**Integrated system.** Access and infotainment systems for hotel management and guests (optional).

**Exclusive mobility.** VIP service and access control systems.

**Reliable performance.** Our hotel elevators are engineered for high-traffic applications.

**Efficient operation.** Options that reduce energy consumption both on standby and during operation.

**Worry-free modernization.** From complete replacements with minimal building adaptation to tailored phased modernization, we ensure maximum traffic capacity with minimum disturbance during modernization work.

## Code compliance

Elevators	EN 81-20/50	Safety requirements for the construction
	EN 81-70	Disabled access
	EN 81-71	Vandal resistance
	EN 81-72	Fire fighter compliance

# Products and packages

## Tailored for hotel operation
